

MOTION PICTURE MINIATURES

www.motionpictureminiatures.com

The following instructions are only intended to be a very basic guide to assembling the dorsal hull using the new neck part. The builder is encouraged to use their own best judgment on how to approach the assembly of the parts, depending on their own specific goals for their project.

Remove the excess material from the replacement part where indicated.

Cut stock kit part as indicated to separate dorsal neck from upper piece

Using the assembled dorsal side walls as an alignment guide, glue the replacement neck in place. Then glue the upper piece in position. Fill and sand any gaps and seams as necessary.
